

L'ATELIER DU PARFUM

PROFESSIONAL SCENT DEVICE

l'Atelier du Parfum Scent Device

Discover our innovative l'Atelier du parfum system specially designed to impress and surprise your guests.

We can help you turn everyday routines into more meaningful rituals and enrich their time with you. From arrival to departure.

l'Atelier du Parfum

The l'Atelier du Parfum is a fragrance device for larger areas, such as the hotel lobby or gyms. This technologically advanced system employs an online portal that allows you to control both fragrances' activation times and intensity.

JUST PLUG AND PLAY!

1. Plug your scent system into a power outlet.
2. Connect your scent system to your Wi-Fi network.
3. Download the free My Sense Device app and follow the instructions.
4. You are now spreading unexpected smiles!

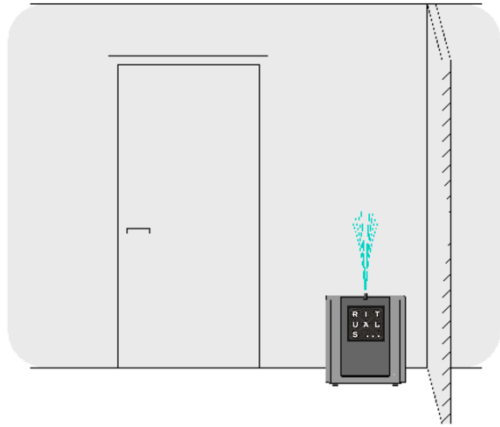

Is your scent cartridge almost empty?

You will receive an automatic notification in your app. This way, you don't have to worry about the cartridge's fill level.

400 ml scent cartridge = 400 hours of nebulisation. This means your scent cartridge lasts for up to 3 months.

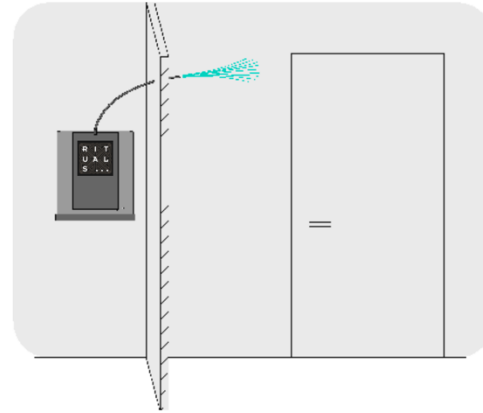

HOW DOES IT WORK?

Stand alone

- No tools, no complicated work. Connect your scent system to your WiFi network within minutes.

Direct injection

- Through a small hole in the wall, the scent mist is injected into the desired area via a scent tube.

Air duct

- Place the scent device in a technical cabinet. The scent mist is injected into the HVAC via a scent duct. This allows the scent to spread optimally in the area.

App Account Creation

For all newly sold devices, please follow the process below:

Share with Rituals the required onboarding details:

- HUB-number (located underneath the scent device)
- Hotel name
- Main hotel contact name
- Main hotel contact email address

Send the information to **hotel@rituals.com**. Rituals will create the account, link the device and send the welcome email to the hotel's contact with further portal instructions.

Important handling instruction:

Please do not move, transport, or turn the device while a cartridge is inside the device.
