Rēd Mask Pro

A light ritual for your skin

*Professional LED therapy
– now available in our wellness*

The treatment of the future

- Red Mask Pro is a premium device using the power of photobiomodulation.
- The combination of red and near-infrared light penetrates deep into the skin layers, where it naturally triggers regenerative processes.
- It is a non-invasive, painless, and highly effective method that restores lost energy to the skin.

Main benefits for the guest

- Immediate brightening effect: Ideal after traveling or fatigue, leaving the skin looking fresh and rested.
- Deep anti-aging: Supports collagen and elastin production, visibly smoothing fine wrinkles.
- Reduction of inflammation and redness: Calms the skin after sun exposure, sauna, and cosmetic procedures.
- Even skin tone: Helps lighten pigment spots and improves texture.
- Mental relaxation: Has a calming effect and promotes overall well-being.

How does the treatment work?

- Preparation: Cleanse the skin so the light can penetrate freely.
- Application: The mask is gently placed on the face. The ergonomic and hygienic design ensures maximum comfort.
- Light bath: For 10 to 15 minutes, you enjoy relaxation in the quiet wellness environment.

Why Red Mask Pro?

- Unlike regular home masks, the PRO version uses clinically calibrated light wavelengths found in leading dermatological centers.
- It is designed to meet the strictest hygienic standards of a professional environment.
