Rēd Mask Pro

A light ritual for your skin

*Professional LED therapy
– now available in our wellness*

Modern LED light care

- Rēd Mask Pro is a premium LED mask designed for facial light care and wellness routines.
- Multiple LED wavelengths are distributed across the mask to provide even illumination of the face. The flexible silicone design adapts comfortably to the contours of the face.
 - Different light modes allow the session to be tailored according to individual preference.

Main benefits for the guest

- A simple 15-minute ritual: an easy way to enjoy a dedicated moment of skincare and relaxation.
- Even facial illumination: LEDs are distributed across the mask for consistent light coverage. Multiple light modes: choose from red, blue, yellow and near-infrared light according to the available device settings. Comfortable design: the flexible silicone material sits gently against the face.
- A moment to unwind: easily incorporated into a relaxing wellness or skincare routine.

How does the session work?

- Preparation: The face is cleansed and the mask is checked to ensure it is clean and dry.
- Positioning: The mask is gently placed on the face and adjusted for a comfortable and secure fit.
- Mode selection: The preferred light mode is selected according to the available device settings.
- Light session: One session lasts approximately 15 minutes, allowing you to enjoy a quiet moment of rest and relaxation.

Why Rēd Mask Pro?

- Professional design suitable for hotel wellness, spa and beauty environments.
- Flexible silicone construction for comfortable facial fit.
- Multiple light modes for an individual skincare and wellness routine.
- Silicone surface designed for regular cleaning according to the instructions for use.
- Suitable for repeated professional use when the recommended cleaning and maintenance procedure is followed.
